

8-7
#8 AWG Concentric Copper Conductor

DESCRIPTION

- #8 AWG 7 strand bare copper, concentric lay conductor
- Soft-drawn
- Cross-sectional area of 16,510 circular mills
- Outside diameter of approximately 0.146"
- Finished weight of 51 pounds per 1,000 feet
- Conforms to the requirements of ASTM B-3, ASTM B-8

APPLICATIONS

- Used for grounding electrical systems where high conductivity and some flexibility is required.
