

EXOTHERMIC WELDING

Safety Training and Certification

This training provides your team with understanding of Harger's Ultraweld exothermic welding system. The exothermic welding process is presented as a means of making permanent electrical connections. Proper training is essential for safely making high quality electrical connections.

SAFETY FIRST

****You are ultimately responsible for your own safety and safety of others****

Topics covered include:

- The tools required to make a connection
- Proper handling and care/cleaning of tools
- SAFETY and required PPE
- Trouble-shooting and the inspection process

Attendees become certified!

How Do You Get Started?

- Work with your Harger Sales Representative to select a date and time that works best for you and your team.
- Duration of class is dependent on number of attendees.
- Upon completion of training, attendees must pass a test to obtain certification.
- Individual certification cards will be sent for distribution after successful class completion. An electronic PDF certificate will be emailed.

Schedule your class today!

In-person class plus a hands-on session

- Certificates valid 36 months from date of class
